Declaration of Compliance

For Aluminium food contact articles - Aluminium - Inside polyester lacquered

Last updated: 2026-10-02
Valid from: 2026-11-22

1. Issued / Manufactured / Imported by

Plus Pack Group
Odense (DK) / Genk (BE)

2. Identification of the product

Combination of materials (outside to inside)
Lubricant - (lacquer/print) - aluminum foil - Polyester lacquer - lubricant

Product reference(s)

Item number	Product Group	Technical Name
0072511000	Ready2Cook®	RECT.787ML.LACQ.BULK

3. Compliance with food contact legislation

This item supplied by Plus Pack is intended to come into contact with the indicated foodstuffs and comply with the following EU Commission regulations and directives under the filling/treatment and storage conditions:

- Framework Regulation (EC) 1935/2004 on materials and articles intended to come into contact with food of 27 October 2004, as amended on the above-mentioned date of last update, in particular articles 3, 15 and 17.
- Directive (EC) 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food with possible amendments.
- Regulation (EC) 10/2011 relating to plastic materials and articles intended to come into contact with foodstuffs and its latest amendments.
- Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols and bisphenol derivatives with harmonized classification for specific hazardous properties in certain materials and articles intended to come into contact with food, amending Regulation (EU) 10/2011 and repealing Regulation (EU) 2018/213
- EN 602 Aluminium and aluminium alloys - Wrought products - Chemical composition of semi-finished products used for the fabrication of articles for use in contact with food.
- Regulation (EC) 1895/2005 on the restriction of use of certain epoxy derivatives in materials and articles intended to come into contact with food with possible amendments.
- Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste, Repealing 94/62/EC
- Directive (EC) 1907/2006 REACH (Registration, Evaluation and Authorization of Chemicals) with possible amendments.
- Regulation (EU) 1169/2011 - concerning absence of the listed allergens in Appendix II.

All products are suitable for its intended use and have been tested for possible contamination and hazards (interactions) towards products and consumers. Migration tests have therefore been carried out.

Plus Pack will always assist in the choice of packaging, but the packer is ultimately responsible for choosing the right packaging for the product/process. The products must be tested until end of shelf lifetime by correct packaging trials to avoid process problems - product smell, taste or visual deformation of the total end-product. Re-use of the packaging is depending on both production process and product, and subsequently the re-use ability must be evaluated by the packer/producer.

4. Overall migration

This product complies with the overall migration limits, tested under conditions as defined in (EC) 10/2011.
Test conditions from a higher OM level are excepted.

Simulant	Test condition	Result (mg/dm²)
50 % ethanol (simulant D1)	4h at 100°C (OM6) + 10 days at 60°C	Compliant
Rectified olive oil (Simulant D2)	2h at 175°C (OM7) + 10 days at 60°C	Compliant

5. Substances with limits and restrictions

All specific migration limits are met. The restrictions were proved not to be exceeded either by analytical testing or by worst case calculations.

FCM	CAS no.	Substance	SML (mg/kg)	Result (mg/kg)
	50-00-0	Formaldehyde	15	
	91-76-9	2,4-diamino-6-phenyl-1,3,5-trazine	5.0	
	128-37-0	2,6-di-tert-butyl-p-cresol	3.0	
	124-04-9	Adipic acid	60	
	110-17-8	Fumaric acid	360	
	107-21-1 111-46-6	Ethylene glycol Diethylene glycol	30.0	
	100-21-0	Terephthalic acid	7.5	
	121-91-5	Isophthalic acid	5.0	
	120-61-6	Terephthalic acid, dimethyl ester	60	
	128-37-0	Trimellitic anhydride (BHT)	5.0	
	26896-48-0	Tricyclodecane Dimethanol	0.05	
	27176-87-0	Dodecylbenzenesulphonic acid	30	
	103-11-7	Acrylic acid, 2-ethylhexyl ester	6.0	
	103-11-7	Acrylic acid, ethyl ester	0.05	
	126-30-7	2,2-dimethyl-1,3-propanediol	0.05	
	77-99-6	1,1,1-trimethylpropane	30.0	
	108-78-1	2,4,6-triamino-1,3,5 triazine	2.5	
	108-31-6	Maleic anhydride	30.0	
	116-14-3	Tetrafluoroethylene	0.05	
	105-60-2	caprolactam	15.0	
	110-63-4	1,4 butanediol	5.0	
	4098-71-9	Isophorone diisocyanate	1	
	23850-94-4	Monobutyltin tris(2-ethylhexanoate)	0.01	
	-	waxes, refined, derived from petroleum based or synthetic hydrocarbon feedstocks	not specified	
	Ratio (migration testing)			6 dm2/Kg

6. Dual use additives

As required by Regulation (EC) 10/2011 the following table identifies substances used subject to a restriction in food through an authorization as food additive that might be present.

Food additive
E551 ; E553b ; E903 ; E355 ; E338 ; E297 ; E321 ; E913

7. Conditions of use

7.1 Regarding type or types of food

Intended for

Aqueous foods	Yes
Acidic foods	No
Fatty foods	Yes
Dry foods	Yes
Alcoholic foods	Yes

7.2 Regarding time and temperature of treatment and storage of food :

Treatment time: Up to 2 hours at Max. 200 °C

7.3 Any other limitations of use :

Avoid direct contact with strongly acidic food

Use in conventional oven	Yes
Use in microwave	Yes
Use for BBQ / Grill	No
Freezing	Yes
Storage after filling	-40 to +40 °C

8. Absence / presence of chemical substances

To the best of our knowledge and based on the information provided by our supplier(s), these compounds are not expected to be present in the above-mentioned product(s).

- Mineral Oil Hydrocarbons (MOSH/MOAH)
  The food contact material/article is manufactured in accordance with applicable European Union requirements concerning Mineral Oil Saturated Hydrocarbons (MOSH) and Mineral Oil Aromatic Hydrocarbons (MOAH).
  MOSH and MOAH are not intentionally added to the material/articles
- Endocrine disruptors
  Substances classified as endocrine disruptors Category 1 for human health under Regulation (EC) No 1272/2008, substances identified as SVHC due to endocrine-disrupting properties under REACH are not intentionally used, unless specifically permitted by applicable EU legislation.
- Bisphenol A (BPA) and Other Hazardous Bisphenols
  Bisphenol A (BPA, CAS No. 80-05-7) and its salts are not intentionally used in the manufacture of this material/article
- Primary Aromatic Amines (PAA)
  The packaging material complies with the applicable requirements for Primary Aromatic Amines (PAA) under Commission Regulation (EU) No 10/2011, including the restrictions laid down in Annex II.
- Phthalates
  The packaging material complies with the applicable requirements for phthalates under European Union legislation.
  No phthalates are intentionally added unless their use is specifically authorised for the intended application under applicable European Union legislation.
- The packaging complies with Regulation (EU) 2025/40, Article 5
  - SVHC / substances of concern: presence is minimised and applicable REACH requirements are fulfilled.
  - Heavy metals: the total concentration of Pb, Cd, Hg and Cr(VI) does not exceed 100 mg/kg. This requirement is carried over from the previous Packaging and Packaging Waste Directive 94/62/EC.
  - PFAS in food-contact packaging: PFAS is not intentionally added.
  Compliance is supported by appropriate supplier documentation.

9. Inventory Storage

The articles should be stored in a clean and dry environment, protected from direct sunlight, chemicals, strong odours and extreme temperatures. Storage between 5 - 25°C and at maximum 70% RH.

Disclaimer

The information included in this document is based on the present state of our knowledge and is valid from the stated issue date until this document is superseded. Because of possible changes in the underlying legislation and regulations, as well as possible changes in this Product, we cannot guarantee that the status of this document will remain unchanged. It will be renewed in all cases where the previous conformity is no longer ensured.

The statement is based on documentation from Plus Pack suppliers of raw materials and goods. The declaration is indicative and applies to the product when used during normal and foreseeable conditions consistent with referred temperature-, time- and contact constraints.

Plus Pack will always assist in the choice of packaging, but the packer is ultimately responsible for choosing the right packaging for the product/process. The products must be tested until end of shelf lifetime by correct packaging trials to avoid process problems - product smell, taste or visual deformation of the total end-product. Re-use of the packaging is depending on both production process and product, and subsequently the re-use ability must be evaluated by the packer/producer.

Approved by the Quality Department.
